5. Gender dropdown in profile page does not let users select option `Male` once `Female` is selected

The screenshot displays a user profile page with three main sections: 'Basic', 'Additional Info', and 'Additional Info' (containing a password change form). The 'Basic' section includes fields for Login (BuggySoftware), First Name (Buggy), and Last Name (Software). The 'Additional Info' section includes a Gender dropdown menu (set to 'Female'), Age (asdf), Address (h), Phone, and Hobby. The 'Additional Info' section also includes a 'Change Password' form with fields for Current Password, New Password, and Confirm Password, and a Language dropdown menu (set to 'English'). A 'Save' button and a 'Cancel' link are at the bottom right.
